CARRIER INTERESTS

I am looking for a position where I can use gained experience. I used to work as web developer but I am open to new challenges in any field/industry. I would like to find company that prefers ability of problem solving rather to deep knowledge of some technology / programming language. I'm willing to relocate. I'm ready to dive into new programming languages.

EXPERIENCE

Senior Developer / Software Architect

Jan 2018 - Present

Petit Press, a.s. - PayWall Team

- introduced testing and established TDD
- increased unit test coverage from 0% to 25% (depends on project)
- set up code review culture
- improved code quality by static code analysis (SonarQube)
- prepared several presentation (SOLID principles, Symfony 3.4 features) / mentoring

Senior PHP Developer

Jan 2017 - Jan 2018

Profesia s.r.o. - domelia.sk

- developed bunch of new features

Developer

Sep 2014 - Oct 2016

Petit Press, a.s. - Core Team

- developed CMS system used by redactors to publish articles
- learned how to work in team
- learned Symfony framework and other PHP libraries/frameworks

Developer

Jan 2011 - Aug 2014

Maurit s.r.o.

- sole developer in small firm
- worked on huge variety of projects (firm intranet, traffic statistics, several project for government - Ministry of Education)
- gain experience how to solve whole web-project alone
- learned many PHP/JavaScript frameworks

ENGLISH

B1 (certificated)

EDUCATION

Information Systems

2008 - 2010

Brno University of Technology Master's Degree

Thesis: Application (written in C++) able to obfuscate JavaScript source code

Information Technology

2005 - 2008

Brno University of Technology Bachelor's Degree

Thesis: Automatic E-Mail Download through WWW Interface (written in Python)
